## What you can expect if you don't restore your sunken concrete.

- Basement water leaks.
- Cracked and bowing foundation walls.
- Erosion of landscaping.
- Unsightly cracking of concrete.
- Depreciated value of home.
- Liability hazards from tripping.

## Why does concrete sink?

Settling of sub-soil caused by erosion (washing out) or poorly compacted fill.

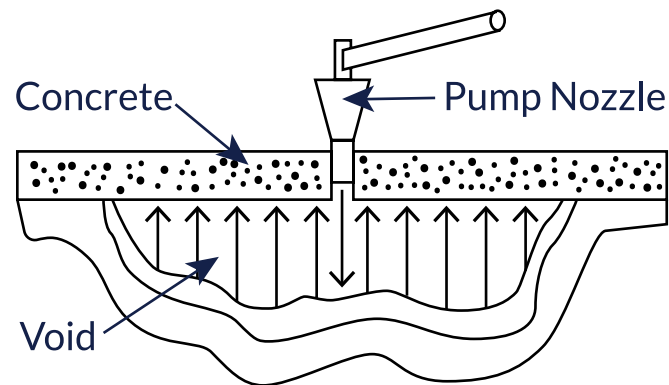

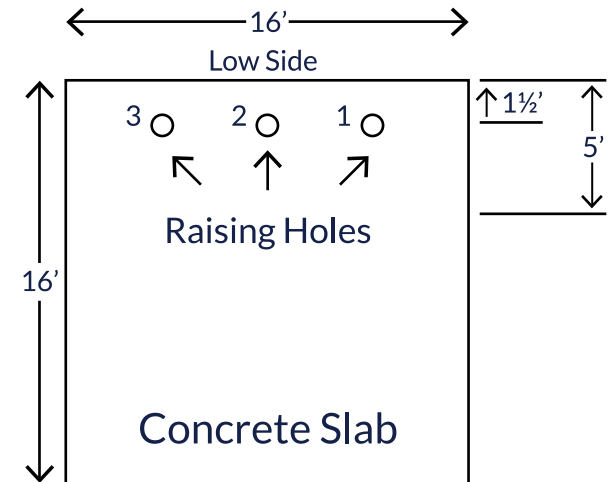

## Why Mudjacking?

- 1/2 the Cost of Replacement
- Clean
- Saves Landscaping
- Complete in Less Than One Day
- Light Equipment
- Ecologically Sound
- Can Fill Voids
- Over 30 Years Experience

## MUDJACKING EXPLAINED STEP BY STEP

1.

A series of 2½" holes are strategically drilled on the settled side of the slab for raising and support.

2.

Using our custom-made "McCabe Mudjacker" we pump under pressure, into the holes, in alternating sequence, a mixture of agricultural products (Lime and Portland). The voids are filled and the slab is raised and restored to its original condition.

3.

Re-Cement Holes

4.

Clean-up
